

DEPARTMENT OF THE NAVY
NSY PUGET SOUND DET BOSTON

ASSAULT CRAFT UNIT FIVE SEA DET. (ACU-5)

SPECIFICATIONS FOR WORK TO BE ACCOMPLISHED

SPECIFICATION NUMBER: SSP:BOST-058-05

SHIP CHARACTERISTICS

| | |
|---------------------------------------|-------------------|
| LENGTH OVERALL | 87 FEET 11 INCHES |
| MAX. BEAM AT DESIGN WATERLINE | 46 FEET 9 INCHES |
| EXTREME BEAM INCLUDING APPENDAGES | 47 FEET 0 INCHES |
| DRAFT (MAX. NAVIGABLE) (FWD.) | 2 FEET 7 INCHES |
| DRAFT (MAX. NAVIGABLE) (AFT.) | 2 FEET 7 INCHES |
| LIGHT DISPLACEMENT | 169 LONG TON |
| FULL LOAD DISPLACEMENT | 184 LONG TON |
| HEIGHT OF MAST ABOVE DESIGN WATERLINE | 32 FEET 4 INCHES |

22 DEC 2004

DATE PREPARED

I N D E X

| | | |
|---------------------|--|----------------------|
| ✓ 009-39 | Technical Manual Contract Requirement (TMCR) for New | 29 AUG 03 |
| | Technical Manuals for Commercial Equipment/Component, | |
| | provide | |
| 009-40 | Requirements for Contractor Cranes at Naval Facilities; | 30-AUG-02 |
| | accomplish | |
| ✓ 009-59 | Organotin Antifouling Material; control | 30 AUG 02 |
| 009-60 | Schedule and Associated Reports; provide and manage | 29-AUG-03 |
| 009-61 | Shipboard Use of Fluorocarbons; control | 29-AUG-03 |
| 009-64 | Synthetic Fire-Resistant Hydraulic Fluid; control | 30-AUG-02 |
| ✓ 009-65 | Polychlorinated Biphenyls (PCBs); control | 30 AUG 02 |
| 009-67 | Integrated Total Ship Testing; manage | 30-AUG-02 |
| 009-69 | Heavy Weather Plan; provide | 29-AUG-03 |
| 009-70 | Confined Space Entry, Certification, Fire Prevention and | 29-AUG-03 |
| | Housekeeping for Unmanned Craft; accomplish | |
| ✓ 009-72 | Physical Security of U.S. Naval Vessels and Crews at | 29-AUG-03 |
| | Private Contractor's Facility; accomplish | |
| 009-73 | Shipboard Electrical/Electronic/Fiber Optic Cable; remove, | 29-AUG-03 |
| | relocate, repair, and install | |
| ✓ 009-77 | Cofferdam Requirements; accomplish | 29 AUG 03 |
| 009-79 | Government Owned Material (GOM); status reporting | 30-AUG-02 |
| ✓ 009-80 | Ship's Facilities; provide | 30 AUG 02 |
| 009-81 | Compartment Closeout Schedule; provide | 30-AUG-02 |
| 009-82 | Data Requirements When Installing an Equal Component Vice | 30-AUG-02 |
| | Specified Component; provide | |
| ✓ 009-83 | Wire Rope Fitting Verification; provide | 30 AUG 02 |
| 009-84 | Accountability of Temporary Fasteners; provide | 30-AUG-02 |
| 009-86 | Recovery of Chlorofluorocarbon (CFC) Refrigerants and Fire | 29-AUG-03 |
| | Suppressant Halon (H) Materials; accomplish | |

I N D E X

| | | |
|----------------------|--|----------------------|
| ✓ 009-87 | Chlorination Procedures; accomplish | 30-AUG-02 |
| 009-88 | Collection, Holding and Transfer (CHT) and Megas Tanks, Spaces, and Piping; certify | 29-AUG-03 |
| ✓ 009-89 | Purchase and Inspection Requirements for Contractor Furnished Zinc Anodes; accomplish | 30-AUG-02 |
| 009-93 | Emergency Planning and Community Right-to-Know Act (EPCRA) and Pollution Prevention Act (PPA) Information; provide | 30-AUG-02 |
| ✓ 009-94 | General Environmental Requirements for Work at Contractor's Facility; accomplish | 29-AUG-03 |
| ✓ 009-95 | Mechanically Attached Fittings (MAF's) for Piping Systems; install | 30-AUG-02 |
| 009-97 | Shipbuilding and Ship Repair Operations National Emission Standard for Hazardous Air Pollutants (NESHAPS) for Surface Coating Information; provide | 29-AUG-03 |
| ✓ 009-99 | Ship Departure Report; provide | 29-AUG-03 |
| ✓ 009-100 | Ship's Stability (PCP); maintain | 30-AUG-02 |
| ✓ 009-101 | Requirements for Mooring, Entry to and Departure from Contractor's Facility; accomplish | 29-AUG-03 |
| 009-102 | Alteration Verification; provide | 30-AUG-02 |
| ✓ 009-103 | Weight and Moment Change Data; provide | 30-AUG-02 |

ITEMS THAT ARE STRUCK OUT ON THIS INDEX DO NOT APPLY TO THIS CONTRACT.

CATEGORY I. FY-05 STANDARD ITEMS APPLICABLE TO THIS JOB ORDER WITHOUT FURTHER REFERENCE

| <u>ITEM NO.</u> | <u>TITLE</u> | <u>DATE</u> |
|----------------------|--|----------------------|
| 009-01 | General Criteria; accomplish | 29-AUG-03 |
| 009-02 | Reporting of Material Usage Requirements for Work at Naval Facilities for Environmental Compliance; accomplish | 29-AUG-03 |
| 009-03 | Toxic and Hazardous Substances; control | 29-AUG-03 |
| 009-04 | Quality System; provide | 29-AUG-03 |
| 009-05 | Temporary Accesses; provide | 29-AUG-03 |
| 009-06 | Protection During Contamination-Producing Operations and Maintaining Cleanliness; accomplish | 29-AUG-03 |
| 009-07 | Confined Space Entry, Certification, Fire Prevention and Housekeeping; accomplish | 29-AUG-03 |
| ✓ 009-08 | Fire Protection at Contractor's Facility; accomplish | 29-AUG-03 |
| ✓ 009-10 | Shipboard Asbestos Containing Material (ACM); control | 30-AUG-02 |
| 009-18 | Magnetic Material; control | 30-AUG-02 |
| 009-19 | Provisioning Technical Documentation (PTD); provide | 30-AUG-02 |
| 009-20 | Government Property; control | 30-AUG-02 |
| OK 009-21 | Logistics and Technical Data; provide | 30-AUG-02 |
| 009-23 | Interferences; remove and install | 29-AUG-03 |
| 009-24 | Isolation, Blanking, and Tagging Requirements; accomplish | 29-AUG-03 |
| ✓ 009-29 | Asbestos Free Pipe Hanger Liner Material; install | 30-AUG-02 |
| ✓ 009-34 | Fire Protection of Unmanned Craft at Contractor's Facility; provide | 30-AUG-02 |
| 009-35 | Confined Space Entry, Certification, Fire Prevention and Housekeeping; accomplish | 29-AUG-03 |

I N D E X

CATEGORY II. FY-05 STANDARD ITEMS WHICH MAY BE INVOKED IN THE WORK ITEMS OF THIS JOB ORDER

| <u>ITEM NO.</u> | <u>TITLE</u> | <u>DATE</u> |
|-----------------|---|-------------|
| 009-09 | Process Control Procedure (PCP); provide and accomplish | 29-AUG-03 |
| 009-11 | Insulation and Lagging Requirements; accomplish | 30-AUG-02 |
| 009-12 | Welding, Fabrication, and Inspection Requirements; accomplish | 29-AUG-03 |
| 009-13 | Meter; repair and calibrate | 30-AUG-02 |
| 009-14 | Gages and Thermometers; repair and calibrate | 30-AUG-02 |
| 009-15 | Rotating Machinery; balance | 30-AUG-02 |
| 009-16 | Electronic Equipment; repair | 30-AUG-02 |
| 009-17 | Rotating Electrical Equipment; repair | 29-AUG-03 |
| 009-22 | Shipboard Electric Cable; test | 29-AUG-03 |
| 009-25 | Structural Boundary Test; accomplish | 29-AUG-03 |
| 009-26 | Teletype Equipment; repair | 30-AUG-02 |
| 009-27 | Material Identification and Control (MIC) for Level I Systems; accomplish | 30-AUG-02 |
| 009-28 | Metal-Sprayed Coating System for Corrosion Protection; accomplish | 30-AUG-02 |
| 009-30 | Boiler Sample Tubes; inspect | 30-AUG-02 |
| 009-31 | Boiler Waterjet Cleaning; accomplish | 30-AUG-02 |
| 009-32 | Cleaning and Painting Requirements; accomplish | 16-MAR-04 |
| 009-33 | Rotating Electrical Equipment; rewind | 29-AUG-03 |
| 009-36 | Controller; repair | 30-AUG-02 |
| 009-37 | General Procedures for Woodwork; accomplish | 29-AUG-03 |

I N D E X

| | | |
|--------|---|-----------|
| 009-38 | Boiler Dry Lay-up; accomplish | 30-AUG-02 |
| 009-41 | Technical Manual Contract Requirement (TMCR) for a Topically Structured Technical Manual; provide | 29-AUG-03 |
| 009-42 | Technical Manual Contract Requirement (TMCR) for Updating Technical Manuals; provide | 29-AUG-03 |
| 009-43 | Light-Off Assessment (LOA) Support for Steam Propulsion System; provide | 29-AUG-03 |
| 009-44 | Light-Off Assessment (LOA) Support for Gas Turbine Propulsion System; provide | 29-AUG-03 |
| 009-45 | Tapered Plug Valve; repair | 29-AUG-03 |
| 009-46 | Butterfly Valve, Synthetic and Metal Seated; repair | 29-AUG-03 |
| 009-47 | Gate Valve; repair | 29-AUG-03 |
| 009-48 | Pressure Seal Bonnet Valve; repair (shop) | 29-AUG-03 |
| 009-49 | Pressure Seal Bonnet Valve; repair (in-line) | 29-AUG-03 |
| 009-50 | Horizontal Swing Check Valve; repair | 29-AUG-03 |
| 009-51 | Globe, Globe Angle, and Globe Stop Check Valve; repair | 29-AUG-03 |
| 009-52 | Relief Valve; repair | 29-AUG-03 |
| 009-53 | Bolted Bonnet Steam Valve; repair (shop) | 29-AUG-03 |
| 009-54 | Bolted Bonnet Steam Valve; repair (in-line) | 29-AUG-03 |
| 009-55 | Regulating/Reducing Valve; repair | 29-AUG-03 |
| 009-56 | Boiler Wet Lay-Up; accomplish | 30-AUG-02 |
| 009-57 | Reduction Gear Security Requirements; accomplish | 30-AUG-02 |
| 009-58 | Pump and Driver Shaft Alignment; accomplish | 29-AUG-03 |
| 009-62 | Boiler Handhole and Manhole Seats and Plates; inspect | 29-AUG-03 |
| 009-63 | Lubricating Oils and Hydraulic Fluids; analyze | 30-AUG-02 |

I N D E X

| | | |
|---------|--|-----------|
| 009-66 | Light-Off Assessment (LOA) Support for Diesel Propulsion System; provide | 29-AUG-03 |
| 009-68 | Bolted Bonnet Valve; repair | 29-AUG-03 |
| 009-71 | Testing Requirements for Piping Systems; accomplish | 29-AUG-03 |
| 009-75 | Circuit Breaker; repair | 30-AUG-02 |
| 009-76 | Waveguide and Transmission Line Temporary Lay-Up, Pressurization, and Purging; accomplish | 30-AUG-02 |
| 009-78 | Passive Countermeasures System (PCMS) Material Repair/Installation Requirements; accomplish | 29-AUG-03 |
| 009-85 | Government Sponsored Planning Yard/Configuration Data Manager (CDM) On-Site Representative Facility; provide | 30-AUG-02 |
| 009-90 | Technical Representative; provide | 29-AUG-03 |
| 009-91 | Propeller In-Place Inspection; accomplish | 29-AUG-03 |
| 009-92 | Resilient Mount; install | 29-AUG-03 |
| 009-96 | Ball Valve; repair | 29-AUG-03 |
| 009-98 | Monel Fasteners; inspect | 30-AUG-02 |
| 009-104 | Vibration Testing and Analysis; accomplish | 29-AUG-03 |
| 009-105 | Thermal Sprayed Coatings for Machinery Component Repair; accomplish | 29-AUG-03 |

I N D E X

SHIP: ASSAULT CRAFT UNIT FIVE SEA ITEM NO: 077-01-001
DET. (ACU-5)
COAR: 26-058 PCN: LC58-Y018
CMP: NONE
PLANNER: MUNROE

1. SCOPE:

1.1 Title: Hazardous Waste Produced on Naval Vessels; control

1.2 Location of Work:

1.2.1 Throughout the Ship

1.3 Identification:

1.3.1 Not Applicable

2. REFERENCES:

2.1 Resource Conservation and Recovery Act (RCRA)

2.2 Federal Hazardous Materials Transportation Act, 49 U.S.C. 5103

2.3 Applicable Hazardous Waste Manifest Form

2.4 10 U.S.C. 7311

3. REQUIREMENTS:

3.1 Manage and dispose of all hazardous waste listed in 3.5 in accordance with 2.1 and 2.2.

3.1.1 When a Navy generator number is required by this Work Item, submit the original of 2.3 to the SUPERVISOR for assignment of Environmental Protection Agency (EPA) or delegated state environmental agency identification number.

3.1.2 Manage and transport for Navy disposal, Navy-generated hazardous waste listed in 3.5 in accordance with 2.1 and 2.2, as designated by the SUPERVISOR.

3.1.3 Submit one legible copy of 2.3 signed by the owner or operator of the disposal facility to the SUPERVISOR within 48 hours of receipt from owner or operator of disposal facility.

3.2 Complete documentation required by 2.1 and 2.2, using EPA or delegated

SHIP: ASSAULT CRAFT UNIT FIVE SEA DET. (ACU-5)

state environmental agency identification number in accordance with 2.4.

3.2.1 Documentation related to hazardous waste generated solely by the physical actions of Ship's Force or Navy employees (termed Navy-Generated Hazardous Waste) on board the vessel shall only bear a generator identification number issued to the Navy pursuant to applicable law. The contractor shall obtain SUPERVISOR'S concurrence with the categorization of the waste as Navy-generated before completion of the manifest. The manifest prepared shall be presented to the SUPERVISOR for completion after the hazardous waste has been identified.

3.2.2 Documentation related to hazardous waste generated solely by the physical actions of contractor personnel (termed Contractor-Generated Hazardous Waste) shall bear a generator identification number issued to the contractor pursuant to applicable law. Regardless of the presence of other material in or on the shipboard systems or structure which may have qualified a waste stream as hazardous, where the contractor performs work on a system or structure using materials (whether or not the use of such materials was specified by the Navy) which by themselves would cause the waste from such work to be a hazardous waste, documentation related to such waste shall only bear a generator number issued to the contractor.

3.2.3 Documentation related to hazardous waste generated by the combined physical actions of Navy and contractor personnel (termed Co-Generated Hazardous Waste) shall bear a generator identification number issued to the contractor pursuant to applicable law and shall also cite in the remarks block a generator identification number issued to the Navy pursuant to applicable law. When the contractor merely drains a system and such drainage creates hazardous waste or the contractor performs work on system or structure using materials which by themselves would not cause the waste from such work to be hazardous waste but such work nonetheless creates a hazardous waste, documentation related to such waste shall bear a generator identification number issued to the contractor and shall also cite in the remarks block a generator identification number issued to the Navy. The contractor shall sign the generator certification on the Uniform Hazardous Waste Manifest whenever use of the manifest is required for disposal. The contractor shall obtain SUPERVISOR's concurrence with the categorization of the wastes as co-generated before completion of the manifest. Manifests prepared shall be presented to the SUPERVISOR for completion after the hazardous waste has been identified.

3.3 If the contractor, while performing work at a Government facility, cannot obtain a separate generator identification number from the state in which the availability will be performed, the contractor shall notify the SUPERVISOR within three business days of receipt of written notification by the state. After obtaining approval of the SUPERVISOR, the contractor shall use the Navy site generator identification number and insert in the remarks block the

SHIP: ASSAULT CRAFT UNIT FIVE SEA DET. (ACU-5)

contractor generator identification number issued for the site where his main facilities are located.

3.4 If, for availabilities at a contractor-owned or controlled facility, the Navy cannot obtain a separate generator identification number for use at a contractor facility, the Navy shall notify the contractor within three business days of receipt of notification by the state. The contractor shall dispose of hazardous waste in accordance with 2.1, 2.2, and 3.2.3.

3.5 Hazardous waste, as identified in 2.1, expected to be produced during performance of this Job Order:

| TYPE | NAVY | AMOUNT CO-GENERATED | CONTRACTOR |
|--|-------|------------------------|------------|
| Acid Solutions (may include spent sulfamic, citric, chromic, nitric, sulfuric, hydrochloric, etc.) | _____ | _____ | _____ |
| Ethylene Glycol (Antifreeze) | _____ | _____ | _____ |
| Sodium Hydroxide | _____ | _____ | _____ |
| Cleaning Solvents | _____ | 75 Gals _____ | _____ |
| Sodium Phosphates (Tri, Bi, or Mono) | _____ | _____ | _____ |
| Fluorocarbons | _____ | _____ | _____ |
| Morpholine | _____ | _____ | _____ |
| Sodium Chromates | _____ | _____ | _____ |
| Hydrazine | _____ | _____ | _____ |
| Methyl Ethyl Ketone | _____ | _____ | _____ |
| Spent Abrasive Blast Material (contaminated with a known hazardous waste) | _____ | 10 Tons _____ | _____ |
| Trichloroethane | _____ | 75 Gals _____ | _____ |
| Miscellaneous Chemicals (Ignitable) | _____ | 25 Gals _____ | _____ |

SHIP: ASSAULT CRAFT UNIT FIVE SEA DET. (ACU-5)

| | | | |
|--|-------|---------------|-------|
| Miscellaneous Chemicals (Corrosive) | _____ | 10 Gals_____ | _____ |
| Miscellaneous Chemicals (TCLP Toxic) | _____ | _____ | _____ |
| Miscellaneous Chemicals (Reactive) | _____ | 10 Gals_____ | _____ |
| Oil (Hydraulic) | _____ | 200 Gals_____ | _____ |
| Paints (Enamel, Latex, Epoxy, thinners, oil based, rubber paint, non-skid, lacquer, remover, varnishes) | _____ | 50 Gals_____ | _____ |
| Paints (May include lead, cadmium, or chrome) | _____ | _____ | _____ |
| Paint Strippers (phenols, lead, chromium) | _____ | _____ | _____ |
| Sludge (Contaminated with a known hazardous waste) | _____ | 100 Gals_____ | _____ |
| Wool Felt (contaminated with chromium and PCB's) | _____ | _____ | _____ |
| Oily Rags | _____ | 300 Lbs_____ | _____ |
| Oil/Water | _____ | 100 Gals_____ | _____ |

3.5.1 Provide \$4600.00 dollars for managing and disposing of all hazardous waste listed in 3.5. Total cost greater or less than above dollar amount when authorized will be the subject of an equitable adjustment.

3.6 Notify the SUPERVISOR at least one working day prior to shipment of hazardous waste for disposal.

3.7 Submit one legible copy, in hard copy or electronic media, of a report identifying type, amount, and disposal cost of waste listed in 3.5 that was removed during the performance of this Job Order to the SUPERVISOR.

3.7.1 The report shall include analysis or other method used to identify the waste and state whether each listed waste was hazardous (with generator assignment), non-hazardous, or did not exist.

SHIP: ASSAULT CRAFT UNIT FIVE SEA DET. (ACU-5)

3.7.1.1 Chemical analysis shall be accomplished by laboratories with state or EPA approved quality assurance programs.

3.7.2 The contractor shall make an effort to minimize hazardous waste generation by reducing the volume or toxicity by neutralizing, recycling, or otherwise removing it from the requirements of Subtitle C of 2.1 and include a description of such efforts in the report.

3.8 Nothing contained in this Work Item shall relieve the contractor from complying with applicable federal, state, and local laws, codes, ordinances, and regulations, including the obtaining of licenses and permits in connection with hazardous waste handling and disposal in the performance of this contract.

4. NOTES:

4.1 The waste listed in 3.5 is based on the best information available at the time of preparation of the solicitation. Hazardous waste generated during the actual performance of the work may vary in type or amount from waste listed in 3.5 which may result in renegotiation for credit or increase pursuant to Paragraph (b) of 2.4. The contractor is expected to use best management practice to identify and dispose of all hazardous waste. Some of the substances listed in 3.5 may be neutralized, recycled, or otherwise removed from the requirements of Subtitle C of 2.1. Inclusion of these substances in the waste listed in 3.5 does not preclude the contractor from taking action consistent with 2.1 to reduce or eliminate the hazardous constituents of any waste required to be disposed of under the contract in accordance with 2.2. Processes that add hazardous constituents to the bilges may require that bilge water be disposed of as a hazardous waste.

4.1.1 The types and amounts of wastes listed in 3.5 are estimates of waste to be disposed of under this contract as required by 2.4. They are not estimates of the amount of the work involved in generating that waste. The work requirements of each individual Work Item specify the actual work to be accomplished.

4.2 Hazardous wastes are determined by one or more of the following methods:

4.2.1 Chemical analysis which shows that the material characteristics of ignitability, corrosivity, reactivity, and/or toxicity (Toxicity Characteristic Leachate Procedure - TCLP) exceed the limits for that material in 40 CFR 261.20 Subpart C.

4.2.2 Reference to a Material Safety Data Sheet (MSDS), or

4.2.3 Applying knowledge of the hazardous characteristics of the waste in light of the materials or the process used.

4.3 Asbestos, bilge water, oil/water including sludge, debris and other

SHIP: ASSAULT CRAFT UNIT FIVE SEA DET. (ACU-5)

contaminants, sludge which includes solids and sludge from ballast tanks, CHT tanks, voids, oily waste tanks, fuel ballast tanks, fuel oil tanks, skegs (West coast), PCB's (Maryland), etc., apply only in those states listing them as hazardous waste. When an availability is to be performed in a state where these items are hazardous waste, an estimate of the amount to be generated shall be included in 3.5.

5. GOVERNMENT FURNISHED MATERIAL (GFM):

5.1 LLTM:

1. None.

5.2 PUSH MATERIAL:

1. None.

5.3 KITTED MATERIAL:

1. None.

3. REQUIREMENTS:

3.1 Clean the exterior surfaces of the underwater hull. Accomplish the requirements of Paragraphs 631-5.5 and 631-5.5.1 of 2.2 using the hydroblast method with a maximum pressure of 1500 PSI, prior to inspection.

SHIP: ASSAULT CRAFT UNIT FIVE SEA DET. (ACU-5)

(I)(V) "VISUAL INSPECTION"

3.2 Accomplish a visual inspection of entire exterior underwater hull plating including landing rails and extrusions (hats) for cracks, erosion, pitting, deterioration, deformation and damage. Use 2.3 through 2.10 for guidance during inspection.

3.2.1 Submit one legible copy, in hard copy or electronic media of a report listing results of the requirements of 3.2 to the SUPERVISOR showing locations of deficiencies and recommendations for repairs.

3.3 Accomplish found repairs by removing existing and installing new, a total of (30) square feet of plate and weld repair a total of (5) linear feet of defective welds and install a total of (12) linear feet of new hat sections, and clad weld a total of (3) square feet to equal a total of (60) locations, as determined by inspection of 3.2 and as authorized by the SUPERVISOR.

3.3.1 Exact areas of repairs shall be designated by the SUPERVISOR.

3.3.2 The minimum size for insert plates shall be one square foot in area.

3.3.3 Do not cut any frames or main structural members without prior approval of the SUPERVISOR.

3.3.4 Replacement material shall be in accordance with 2.5 through 2.10.

3.4 Accomplish the requirements of 009-12 of 2.1, including Table 4, Column C, Lines one through 7.

3.4.1 Accomplish Non-Destructive Testing in accordance with Line 10.

3. REQUIREMENTS:

3.1 Accomplish a visual inspection of wet deck compartment surfaces including decks, bulkheads, overheads and structural stiffeners, for structural discrepancies, corrosion, erosion, pits, deformation, defective welds, and cracks, noting exact locations and quantities of discrepancies found using 2.2 through 2.23 for guidance.

3.1.1 Submit one legible copy, in hard copy or electronic media, of a report listing the requirements of 3.1, to the SUPERVISOR, noting exact locations of discrepancies and quantities found and recommendations for repairs.

3.2 Accomplish known repairs by removing existing defective and installing new, a total of 90 square feet of wet deck (hull) plating, including related hat sections, 35 linear feet of stiffeners, a total of 10 square feet of clad weld repair (to equal a total of 100 locations), a total of 20 square feet of plug weld repair (to equal a total of 215 locations), and 5 linear feet of weld repair at locations listed below. Areas of known repairs are detailed in 3.2.1 through 3.2.20. Accomplish in accordance with 2.2 through 2.24.

3.2.1 Remove existing defective and install new, a total of 2 square feet of deck plating (12" x 24"), in compartment 2-5-4-Q. Area to be repaired is located from inboard longitudinal bulkhead, outboard for a length of 2 feet. Plug weld repair a total of 2 square feet of defective deck plating to equal a total

SHIP: ASSAULT CRAFT UNIT FIVE SEA DET. (ACU-5)

of 30 locations.

3.2.2 Remove existing defective and install new, a total of 7 square feet of deck plating (24" x 37") in compartment 2-6-1-A. Area to be repaired is located from 20 inches inboard of outboard longitudinal bulkhead, to 57 inches inboard of outboard of longitudinal bulkhead.

3.2.3 Remove existing defective and install new, a total of 6 square feet of deck plating (24" x 36") in compartment 2-6-2-A. Area to be repaired is located from 20 inches inboard of outboard longitudinal bulkhead to 57 inches inboard of outboard longitudinal bulkhead, and from frame 7, forward for a length of 24 inches.

3.2.4 Remove existing defective and install new, a total of 10 square feet of deck plating at various locations in compartment 2-7-1-V. Plug weld repair a total of 3 square feet of defective deck plating to equal a total of 30 locations.

3.2.5 Remove existing defective and install new, a total of 10 square feet of deck plating at various locations in compartment 2-7-2-V. Plug weld repair a total of 4 square feet of defective plating to equal a total of 50 locations.

3.2.6 Remove existing defective and install new, a total of 4 square feet of plating and a total of 8 linear feet of structural stiffeners in void 2-8.5-1-V.

3.2.7 Remove existing defective and install new, a total of 4 square feet of plating and a total of 8 linear feet of structural stiffeners in void 2-8.5-5-V.

3.2.8 Remove existing defective and install new, a total of 4 square feet of plating and a total of 8 linear feet of structural stiffeners in void 2-8.5-6-V.

3.2.9 Remove existing defective and install new, a total of 4 square feet of deck plating (9" x 48") in compartment 2-10-4-Q. Area to be repaired is located between frame 10 and frame 11, and from inboard longitudinal bulkhead outboard for a length of 9 inches.

3.2.10 Remove existing defective and install new, a total of 8 square feet of deck plating (48" x 25") in compartment 2-12-3-V. area to be repaired is located between frame 12 and frame 13, and from inboard longitudinal bulkhead, outboard for a length of 9 inches. Accomplish 3 linear feet of weld repair to Qty 3, intercostal flat bar stiffeners that are only welded on one side. Stiffeners to be repaired are located on overhead, outboard section of compartment.

3.2.11 Remove existing defective and install new, a total of 4 square

SHIP: ASSAULT CRAFT UNIT FIVE SEA DET. (ACU-5)

feet of deck plating (48' x 11") in compartment 2-13-3-V. Area to be repaired is located between frame 13 and frame 14, and from inboard longitudinal bulkhead, outboard for length of 11 inches. Accomplish one linear foot of weld repair to Qty one, intercostal flat bar stiffener that is only welded on one side. Stiffener is located on overhead, outboard section of compartment.

3.2.12 Remove existing defective and install new, 8 square foot of deck plating (48' x 26") in compartment 2-15-2-Q. Area to be repaired is located between frame 15 and frame 16, and from inboard longitudinal bulkhead, outboard for a length of 26 inches.

3.2.13 Remove existing defective and install new, 8 square foot of deck plating (4' x 26") in compartment 2-15-3-Q. Area to be repaired is located between frame 15 and frame 16, and from inboard longitudinal bulkhead outboard for a length of 26 inches. Clad weld repair a total of One square foot of defective deck plating in the remainder of the compartment to equal a total of 10 locations.

3.2.14 Remove existing defective and install new, 8 square feet of deck plating (4' x 2') in compartment 2-16-6-F. Area to be repaired is located between frame 16 and frame 17, and from inboard longitudinal bulkhead, outboard for a length of 4 inches. Remove existing and install new, a total of 10 linear feet of 4" x 2 1/4" x 1/8" T-beam stiffeners in way of deck repairs.

3.2.15 Clad weld repair a total of one square foot of defective deck plating in compartment 2-5-3-Q to equal a total of 15 locations.

3.2.16 Clad weld repair a total of 2 square feet of defective deck plating in compartment 2-10-3-Q to equal a total of 20 locations.

3.2.17 Clad weld repair a total of 3 square feet of defective deck plating in compartment 2-9-2-A, to equal a total of 25 locations.

3.2.18 Clad weld repair a total of 3 square foot of defective deck plating in compartment 2-12-6-W, to equal a total of 25 locations.

3.2.19 Plug weld repair a total of One square feet of defective deck plating in compartment 2-9-1-A, to equal a total of 10 locations.

3.2.20 Plug weld repair a total of 2 square feet of defective deck plating in compartment 2-11-3-Q, to equal a total of 25 locations.

3.2.21 Plug weld repair a total of One square foot of defective deck plating in compartment 2-14-3-V, to equal a total of 15 locations.

3.2.22 Plug weld repair a total of 4 square feet of defective deck plating in compartment 2-9-2-A, to equal a total of 35 locations.

SHIP: ASSAULT CRAFT UNIT FIVE SEA DET. (ACU-5)

3.2.23 Plug weld repair a total of One square foot of defective deck plating in compartment 2-17-4-Q, to equal a total of 10 locations.

3.2.24 Plug weld repair a total of One square foot of defective deck plating in compartment 2-17-2-Q, to equal a total of 10 locations.

3.2.25 Plug weld repair a total of One square foot of defective deck plating in compartment 2-17-1-Q, to equal a total of 10 locations.

3.3 Accomplish additional repairs by removing existing defective and installing new a total of 50 square feet of plating, 20 linear feet of structural stiffeners and hats and clad weld repair a total of 5 square feet of defective plating, to equal a total of 50 locations, as determined by the inspection of 3.1 and as designated by the SUPERVISOR.

3.4 The minimum size for insert plates shall be one square foot.

3.4.1 Do not cut any frames or main structural members without prior approval of the SUPERVISOR.

3.4.2 Chip and grind surfaces flush and smooth in way of removals.

3.4.3 Replacement material shall be in accordance with 2.2 through 2.24.

3.5 Accomplish the requirements of 009-12 of 2.1, including Table 4, Column C, Lines One through 7.

3.5.1 Accomplish Non-Destructive Testing in accordance with Line 10.

(V) (G) "VACUUM TEST"

3.6 After completion of all structural repairs, accomplish a vacuum test of voids and spaces disturbed by repairs in accordance with Chapter 5 of 2.24.

3.6.1 Submit one legible copy, in hard copy or electronic media, of a report listing the results of 3.6, to the SUPERVISOR.

3. REQUIREMENTS:

SHIP: ASSAULT CRAFT UNIT FIVE SEA DET. (ACU-5)

3.1 Disconnect and roll back electrical cables in way of repairs associated with this work item.

3.1.1 Reinstall cables (original) after completion of repairs utilizing new penetration seals.

3.2 Drain and dispose of fluids from the following systems:

3.2.1 Propeller lubricating systems.

3.2.2 Propeller, rudder and bow thruster hydraulic systems.

3.2.3 Main propulsion engines.

3.2.4 Auxiliary power units.

3.2.5 Main engine gear boxes and forward and aft offset gear boxes and lubricating systems.

3.3 Accomplish the requirements of 009-09 of 2.1 for fabricating and installing fixtures to eliminate structural distortion of the port and starboard engine modules while accomplishing structural repairs to each module.

3.4 Remove port and starboard engine modules, lift fan assemblies, bow thrusters, main engine gear boxes, forward and aft offset gear boxes, APU units and port and starboard propellers in accordance with 2.2 through 2.17.

3.4.1 Fabricate and install fixtures from accepted procedure in 3.3 in each engine module.

3.4.1.1 Fixtures installed in 3.4.1 for filter bays shall be installed prior to unbolting and removal of each engine module and shall be installed until each engine module is completely reinstalled and aligned.

3.4.2 Equipment removed in 3.4 shall be turned over to the SUPERVISOR.

3.5 Solvent clean deck areas in way of removed equipment listed in 3.4. Accomplish the requirements of Surface Preparation Specification, SSPC-SP-1 of 2.18.

3.6 Accomplish a visual inspection of machinery deck plating below engine and lift fan modules for erosion, corrosion, pitting, deformation and damage during overhaul period using 2.19 and 2.20 for guidance.

3.6.1 Submit one legible copy, in hard copy or electronic media, of a report listing the results of the requirements of 3.6 to the SUPERVISOR, showing exact locations of deficiencies and recommendations for repairs.

3.7 Accomplish liquid penetrant tests on suspect test areas as designated by

SHIP: ASSAULT CRAFT UNIT FIVE SEA DET. (ACU-5)

the SUPERVISOR, as a result of visual inspection reports of 3.6.1, in accordance with chapter 5 of 2.20 and 2.21.

3.7.1 The accept and rejection requirements shall be in accordance with 2.22.

3.7.2 Submit one legible copy, in hard copy or electronic media, of a report listing the results of the requirements of 3.7 with recommended remedial action to the SUPERVISOR.

3.8 Remove defective and install new, a total of 280 square feet of machinery deck plating, 60 linear feet of structural stiffeners, reweld 15 linear feet of defective butt welds and seams and clad weld 15 square feet of plating as authorized by the SUPERVISOR as a result of 3.6.1 and 3.7.2.

3.8.1 Exact areas of replacements shall be designated by the SUPERVISOR.

3.8.2 The minimum size for insert plates shall be one square foot in area.

3.8.3 Do not cut any frames or main structural members without prior approval of the SUPERVISOR.

3.8.4 Replacement material shall be in accordance with 2.23 and 2.24.

3.8.5 Accomplish the requirements of 009-12 of 2.1, including Table 4, Column C, Lines One through 7.

3.8.5.1 Accomplish Non-Destructive Testing in accordance with Line 10.

3.8.5.2 Submit one legible copy, in hard copy or electronic media, of a report listing the results of the requirements of 3.8.5.1 to the SUPERVISOR.

3.9 Reinstall equipment removed in 3.4 including main propulsion engines and auxiliary power units in accordance with 2.2, 2.17 and 2.27. To facilitate the reinstallation of the engine and volute modules, plug weld existing bolting holes used for anchoring the modules not disturbed by installations noted in paragraph 3.8. Layout, drill and tap new anchoring holes during the reinstallation process of the modules after all final alignments are obtained in accordance with 2.2 through 2.17.

3.9.1 Prior to installation of main engines, remove and install new tadpole seals in exhaust collector assemblies in accordance with 2.25.

(I) (G) "SURFACE PREPARATION"

SHIP: ASSAULT CRAFT UNIT FIVE SEA DET. (ACU-5)

3.9.2 Prior to reinstalling port and starboard engine modules and port and starboard volute assemblies, accomplish the requirements of 009-32 of 2.1 including Table 2, Line 16, Columns A through D for surface preparation and application of an epoxy coating system on each module and volute underside surfaces with the exception that an additional, final coat of Formula 151 shall be applied to each module and volute assembly underside surfaces to a minimum dry film thickness of 2 - 4 mils.

3.9.3 Fill the systems and equipment drained in 3.2 to the fill marks with new oil conforming to the requirements of 2.3 through 2.17.

3.9.4 Prior to reinstalling port and starboard engine modules, temporarily remove sections of each wave fence aft of the modules to facilitate reinstallation due to deck penetration modifications being accomplished in Work Item 130-80-001. Reinstall temporarily removed sections of each wave fence after each module is reinstalled, using 2.26 for guidance.

3.9.4.1 Accomplish the requirements of 009-12 of 2.1, including Table 4, Column C, Lines One through 7.

3.9.5 Install sealant on all flanges and joints of the lift fan volutes in accordance with 2.27.

3.10 Align installed equipment in 3.9 in accordance with 2.2 through 2.17.

3.10.1 Submit one legible copy, in hard copy or electronic media, of a report listing the results of the requirements of 3.10 to the SUPERVISOR.

3.11 Remove fixtures installed in 3.4.1 from each engine module.

2.5 151-5749260 Rev K, Floor Assembly Engine Compartment

2.6 DOD-STD-2003, Electric Plant Installation, Standard Methods for Surface Ships and Submarines

2.7 LCAC CRAFTALT-0237D Rev 01, Machinery Module Deck Penetrations

3. REQUIREMENTS:

3.1 Accomplish removals, modifications and installations incidental to LCAC1 Class CraftAlt-0237D Rev 01, Mach Module Deck Penetrations, at locations listed in 1.2.1 in accordance with 2.2 and 2.3. Use 2.4, 2.5 and 2.7 for guidance.

3.1.1 Disconnect electrically and mechanically, and pull back cables necessary to accomplish the requirements of this work item. Record and retain electrical hook-up data and MCT insert cable size and location.

3.1.2 Disconnect and remove piping necessary to accomplish the

SHIP: ASSAULT CRAFT UNIT FIVE SEA DET. (ACU-5)

requirements of this work item. Matchmark and retain material required for reinstallation in accordance with 2.3.

3.1.3 Install new multi cable transits and piping penetrations in accordance with 2.2.

3.1.4 Accomplish the requirements of 009-12 of 2.1, including Table 4, Columns C and D, Lines One through 7.

3.1.4.1 Accomplish Non-Destructive testing in accordance with Line 10.

3.2 Install cabling and piping removed in 3.1 and new rubber inserts and new MCT inserts, using retained hook-up data and material of 3.1.1 and 3.1.2, 2.2, 2.3 and 2.6 for guidance. Install new banding as required to secure cabling.

3.2.1 Clean and flush the new and disturbed sections of piping affected by this work item, with hot fresh water for one hour. The temperature of the water shall not drop below 110 degrees Fahrenheit at the outlet of the flushed pipes.

(I) (G) "HYDROSTATIC TEST"

3.3 Accomplish the requirements of 009-71 of 2.1, for piping systems modified by this work item, using clean, fresh water at 135% of system operating pressure, using 2.3 for guidance.

3.3.1 Remove fluid upon completion of hydrostatic tests. Allowable residual fluid: None.

3.3.2 Submit one legible copy, in hard copy or electronic media, of a report listing results of the requirements of 3.3 to the SUPERVISOR.

(V) (G) "OPERATIONAL TEST"

3.4 Accomplish an operational test of the piping systems modified by this work item, under system operating pressure and reconnected electrical equipment affected by this work item.

3.4.1 Allowable leakage at new and disturbed joints: None.

3.4.2 Submit one legible copy, in hard copy or electronic media, of a report listing results of the requirements of 3.4 to the SUPERVISOR.

2.4 513-5750013 Rev P, Duct Installation - Upstream Cooling Air

3. REQUIREMENTS:

3.1 Accomplish removals of worn/torn hoses and corroded clamps and installations of new hoses with associated clamps to the inlet air to main engine and apu filter system at location listed in 1.2, Qty (One) 12 inch x 12 inch hose and Qty (One) 1 1/2 inch x 36 inch hose.

3.1.1 Fabricate new hose sections, using existing sections as a template in accordance with 2.2 through 2.4.

3.1.2 Restore mating surfaces exposed by removals. Repair by removing high spots, burrs, abrasions, and foreign matter, where removal can be accomplished by hand tools.

3.2 Accomplish an operational test of the newly modified and installed hoses to the apu filter system under system operating pressures. Allowable leakage at new and disturbed joints: None.

3.2.1 Submit one legible copy, in hard copy or electronic media of a

SHIP: ASSAULT CRAFT UNIT FIVE SEA DET. (ACU-5)

report listing results of the requirements of 3.2 to the SUPERVISOR.

2.6 Systems and Specifications, Steel Structures Painting Manual, Volume 2

2.7 S6360-AE-MMA-010, LCAC Corrosion Control Manual

3. REQUIREMENTS:

3.1 Accomplish surface preparation and preservation of surfaces incidental to LCAC1 Class C/A-0445K, Limited Compartment Painting, at locations listed in 2.3 and in accordance with 2.2, using 2.5 and 2.7 for guidance.

3.1.1 Accomplish an inspection of surfaces at locations listed in 3.1 for oil contamination using a UV "black" light method.

3.1.1.1 Submit four legible copies of a report listing the results of the requirements of 3.1.1 to the SUPERVISOR, listing exact locations,

SHIP: ASSAULT CRAFT UNIT FIVE SEA DET. (ACU-5)

compartment numbers and square footage of contamination.

3.1.2 Solvent clean oil contaminated surfaces listed in report of 3.1.1.1, using a detergent that does not leave a film that interferes with coating adhesion, i.e., "Simple Green". Known degreasing solvents are "Oxsol 100" and "SkyKleen".

3.1.3 Prepare aluminum surfaces for coating applications using any one method or any combination of the following methods:

3.1.3.1 Hand tool cleaning using garnet sandpaper with a minimum grit profile of 30 grit.

3.1.3.2 Power tool cleaning, limited to disc grinders using garnet paper with a minimum grit profile of 30 grit.

3.1.3.3 Near white metal blast cleaning using garnet or aluminum oxide, conforming to MIL-A-21380, Type One or Mil-A-22262. Grit size shall not exceed a maximum size of 50 grit.

3.1.3.4 Hydroblast cleaning using a slurry system with an 80 grit garnet abrasive.

3.1.4 Accomplish the requirements of 009-90 of 2.1 to obtain the services of a NACE I/PI-1 certified coating inspector for quality assurance requirements during the surface preparation and application of coatings.

3.1.5 After blasting and cleaning operations, accomplish an inspection of peak-to-valley surfaces for profiles of between 2.5 to 3.5 mils. Measurements shall be taken in accordance with Method C of 2.4. Five measurements are to be averaged in accordance with the calculational method as described in SSPC PA-2, with the exception that voids are to be considered independent jobs, thereby necessitating five measurements to be averaged per void. Average surface profiles of 2.5 to 3.5 mils shall be required regardless of the method of surface preparation. The minimum and maximum profile requirements shall be applied to each square foot of the surfaces of the tanks due to the critical nature of these surfaces.

3.1.5.1 Hydroblasted surfaces shall be in accordance with International Courtaulds Marine Paint Company Hydroblasting standard, Very Thorough Hydroblast, HB2 1/2 L.

3.1.6 Clean prepared surfaces free of dust, grit and contaminants prior to application of coatings.

3.1.7 Standards for surface preparation requirements and mixing, stand-in times and application of coatings requirements, where not spoken to in this work item, shall be in accordance with 009-32 of 2.1 and 2.2 through 2.7. It is

SHIP: ASSAULT CRAFT UNIT FIVE SEA DET. (ACU-5)

understood that coating the surfaces within four (4) hours after surface preparation and removal of cleaning materials is difficult to achieve under some circumstances, however with the installation of dehumidification equipment and holding relative humidity levels at 30% to 35%, corrosion due to moisture is relatively minimal, at best and essentially should not occur. In any case coating applications shall occur at the earliest possible time after cleaning operations.

3.1.7.1 Records shall be taken and maintained for surface preparation and applications of coatings in accordance with 009-32 of 2.1 and 2.4.

3.1.7.2 Application of coatings shall be with conventional spray, brush or roller. Airless spray application methods are not allowed.

3.1.8 Dry film thickness readings shall be taken using a non-ferrous DFT gage in accordance with Method PA-2 of 2.6.

4. NOTES:

4.1 Accomplish structural repairs and welding prior to application of any coating materials.

1. SCOPE:

1.1 Title: Craft Runway Trial and Craft Harbor Trial; accomplish

1.2 Location of Work:

1.2.1 Throughout the Craft

1.3 Identification:

1.3.1 Not Applicable

2. REFERENCES:

2.1 Standard Items

3. REQUIREMENTS:

3.1 Schedule and conduct a Craft Runway Trial.

3.1.1 Prepare a proposed Craft Runway Trial Agenda which shall contain a chronological listing of all tests and operations to be performed including proposed duration of events.

3.1.2 The proposed Craft Runway Trial Agenda shall be submitted to the SUPERVISOR, two calendar weeks prior to the scheduled post repair craft runway trial.

(V) (G) "INSPECTION PHASE"

3.1.3 The Inspection Phase, shall be conducted not later than one normal working day prior to the scheduled craft runway trial. The inspection shall be conducted by a team composed of representatives of contractor's personnel and the SUPERVISOR.

3.1.3.1 All temporary rigging, excess equipment and debris shall be removed from the craft prior to the inspection required in 3.1.3. Remove all service lines.

3.1.4 During the craft runway trial the contractor shall provide the services of supervisors and mechanics of all trades to make corrections and

SHIP: ASSAULT CRAFT UNIT FIVE SEA DET. (ACU-5)

adjustments to place systems, equipment and associated components in an optimum operational status in accordance with the requirements of the work item.

3.1.5 The duration of the Craft Runway Trial shall be sufficient to accomplish all scheduled tests and operations, about one hour.

3.1.6 Submit one legible copy, in hard copy or electronic media, of a report listing the Craft Runway Trial results, which shall include copies of the data sheets completed to the SUPERVISOR. The data sheets shall list any discrepancies found during the Craft Runway Trial.

3.2 Schedule and accomplish a Craft Harbor Trial.

3.2.1 Prepare a proposed Craft Harbor Trial Agenda which shall contain a chronological listing of all tests and operations to be performed including proposed duration of events.

3.2.1.1 Tests and operations to be performed during the Craft Harbor Trial are those tests and operations specified in the requirements of the work item for accomplishment during the Craft Harbor Trial or for verification of satisfactory performance during the Craft Harbor Trial.

3.2.2 The proposed Craft Harbor Trial Agenda shall be submitted to the SUPERVISOR two calendar weeks prior to the established Craft Harbor Trial date.

3.2.3 The duration of the Craft Harbor Trial shall be sufficient to accomplish all scheduled tests and operations, about two hours.

3.2.4 The contractor shall submit a listing to the SUPERVISOR of contractor's personnel and any manufacturer's representative who are expected to be onboard the vessel during the sea trial.

3.2.4.1 The complete listing shall be submitted two working days prior to the established Craft Harbor Trial date for records and approval.

3.2.4.2 The listing shall include the person's full name, address, phone number, social security number and next of kin.

3.3 The contractor shall provide certification that temporary or permanent instrumentation furnished to collect data for the Craft Harbor Trial meets the requirements of 009-13 and 009-14 of 2.1.

3.4 The contractor shall provide the services of supervisors and mechanics of all trades to make final corrections and adjustments to place systems, equipment and associated components in an optimum operational status and to make and record applicable test data.

3.4.1 Submit one legible copy, in hard copy or electronic media, of a report listing the Craft Harbor Trial results, which shall include copies of the

SHIP: ASSAULT CRAFT UNIT FIVE SEA DET. (ACU-5)

data sheets completed to the SUPERVISOR. The data sheets shall list any discrepancies found during the Craft Harbor Trial.

3.5 An availability completion review conference shall be conducted at a time and place mutually agreeable to all parties after the Post-Repair Craft Harbor Trial. The SUPERVISOR shall chair the conference. The subject of the conference shall be to establish completeness of the mid-life availability contractual requirements. The development of a coordinated government plan of action to complete unfinished and new work shall also be addressed.

3.6 Should any part of the craft, its machinery plant or equipment affected by the contractor during the availability fail to meet contractual requirements during the Craft Harbor trial, additional trials shall be conducted at the discretion of the SUPERVISOR to provide the opportunity for testing after appropriate modifications and corrective measures have been completed by the contractor.

3.6.1 Additional trials required because of a lack of contractual compliance shall be of no additional expense to the government.

4. NOTES:

4.1 The final Craft Runway Trial Agenda will be determined by the SUPERVISOR.

4.2 The final Craft Harbor Trial Agenda shall be determined by the SUPERVISOR.

3. REQUIREMENTS:

SHIP: ASSAULT CRAFT UNIT FIVE SEA DET. (ACU-5)

3.1 Open, ventilate, empty, clean, render dry and maintain any tank or space including adjacent tanks, spaces or piping systems where the scope of repairs will result in a need for certification during the performance of this Job Order, use 2.7 for location guidance.

3.1.1 Tanks/spaces listed in 1.2.21 through 1.2.118 are to support inspections by Government inspectors.

3.1.2 Ensure that harmful vapors, fumes, or mists are ventilated to the exterior of the vessel.

3.1.3 Submit one legible copy, in hard copy or electronic media, of a report listing the location, origin, and quantity of each manhole cover removed in 3.1 in respect to its tank, ship's frame, and distance off centerline to the SUPERVISOR.

3.1.4 Install expandable plugs or blanks, painted blaze orange, in associated tank piping at the first valve or flange. Associated piping is defined as "an assembly of pipe, tubing, valves, fittings and related components forming a whole or a part of a system which starts or terminates in subject area, thus being common to and associated with same."

3.1.4.1 Submit one legible copy, in hard copy or electronic media, of a report listing the location of each expandable plug and blank to the SUPERVISOR.

3.1.4.2 Remove each expandable plug or blank upon completion of repairs and testing, and install new gaskets and fasteners in accordance with applicable Categories and Group of 2.2 or 2.3.

3.1.5 Clean and disinfect each CHT/sewage tank and associated piping in accordance with 2.4.

3.1.6 Clean each tank and any associated piping in accordance with 2.5 through 2.6.

3.2 Steam clean each area where the removal of preservative is required.

3.2.1 Install new rust preventative compound conforming to MIL-PRF-16173, Grade One.

3.2.2 Install new Monel fill and drain plugs conforming to QQ-N-281, Class B, to replace those removed to accomplish steam cleaning.

3.3 Pump tanks containing petroleum products to the low suction level of each tank.

3.3.1 Products shall be run through a flow meter calibrated in gallons.

SHIP: ASSAULT CRAFT UNIT FIVE SEA DET. (ACU-5)

3.3.2 Off-loading/on-loading of petroleum products shall be accomplished during daylight hours only and no "Hot Work" shall be permitted.

3.3.3 Hoses, pumps, and storage containers shall be clean and dry prior to start of off-loading/on-loading.

3.3.4 Submit one legible copy, in hard copy or electronic media, of completed Attachment A (products inventory) to the SUPERVISOR.

3.3.5 Remove and dispose of liquids not being stored for reuse, including compensating sea water from the compensating fuel tanks, sludge, and debris in accordance with federal, state, and local laws, codes, ordinances, and regulations.

3.3.5.1 Fill the compensating fuel tanks with sea water upon completion of work.

3.4 Take samples of petroleum products from each tank prior to removal from ship and storage.

3.4.1 Accomplish analysis of petroleum products two working days prior to off-loading.

3.4.2 Accomplish a chemical analysis of each sample of distillate fuel and JP-5.

3.4.2.1 Test each sample for flashpoint, using the PENSKEY-MAR TENS method. The flashpoint should be in the range specified by 2.5.

3.4.2.2 Measure and record the API Gravity at 60 degrees Fahrenheit.

3.4.2.3 Check the bottom sediment and water, using a centrifuge. For distillate fuel, sediment and water should be less than 0.1 percent. For JP-5, sediment shall not be greater than 8 milligrams per liter and there should be no visible traces of water.

3.4.2.4 Measure the acid number. The acid number shall be within five percent of the original value upon return to ship.

3.4.2.5 Submit one legible copy, in hard copy or electronic media, of results of the analysis of 3.4.2 to the SUPERVISOR.

(V) (G) "VERIFY OFF LOAD COORDINATION"

3.5 Coordinate the off loading or transferring of fluids through the ship's Damage Control Assistant (DCA), via the SUPERVISOR, to maintain ship's stability and to prevent flooding.

3.5.1 Obtain a list from the SUPERVISOR of petroleum soundings for

SHIP: ASSAULT CRAFT UNIT FIVE SEA DET. (ACU-5)

tanks prior to start of pumping operations.

(V) (G) "VERIFY CLEAN CONTAINER"

3.5.2 Off-load petroleum in the following amounts:

3.5.2.1 Distillate fuel (0) gallons

3.5.2.2 JP-5 (0) gallons

3.5.2.3 Lubricating oil (0) gallons

3.6 Off-load and store or off-load and transport to the nearest Naval Fuel Depot (NFD), at the discretion of the contractor based upon cost effectiveness, the distillate fuel and JP-5.

3.6.1 Notify the SUPERVISOR prior to transporting the off-loaded petroleum products.

3.6.2 Deliver to the nearest NFD when directed by the SUPERVISOR. Conveyance will be accepted from 0730 to 1600, Monday through Friday, holidays excluded. The NFD will accomplish a petroleum analysis requiring a time duration of one hour prior to off-loading each conveyance.

3.6.3 Notify the NFD Director a minimum of five working days prior to delivering the off-loaded petroleum products, via the SUPERVISOR.

3.6.4 Submit one legible copy, in hard copy or electronic media, of completed Attachment A, signed by the NFD Director, listing the amount and type of petroleum products received, to the SUPERVISOR within 24 hours after disposition.

3.6.5 Distillate fuel and JP-5 fuel off-loaded and stored by the contractor shall be sampled and analyzed in accordance with 3.4.1 through 3.4.2.4 prior to on-loading.

3.6.5.1 Submit one legible copy, in hard copy or electronic media, of each analysis to the SUPERVISOR prior to on-load.

3.6.6 Provide ship with same type, grade, and quantity of distillate fuel and JP-5 off-loaded and stored, when directed by the SUPERVISOR.

3.7 Off-load and store in clean storage containers the lube oil and hydraulic oil from the tanks. On-load when directed by the SUPERVISOR.

3.7.1 Accomplish the requirements of 009-63 of 2.1.

3.7.1.1 Test and analyze samples from each tank prior to off-loading.

SHIP: ASSAULT CRAFT UNIT FIVE SEA DET. (ACU-5)

3.7.1.2 Test and analyze samples from each storage container prior to on-loading.

3.8 Clean each bilge of spaces listed in 1.2, free of trash, debris, grease, oily liquids, and other liquid contaminants prior to the initial certification.

3.8.1 Maintain each bilge to a clean, dry condition for the duration of the availability on a 7-day-a-week, 24-hour-a-day basis.

3.8.2 Remove and dispose of an additional 500 gallons of non-hazardous liquids from bilges listed in 1.2, generated by the Navy, after initial cleaning and certification is obtained. Removals shall be measured. Total amount of liquids removed greater or less than the above amount shall be the subject of an equitable adjustment.

(V) (G) "SOURCE DETERMINATION"

3.8.2.1 Submit one legible copy, in hard copy or electronic media, of a report listing the amount of gallons removed in 3.8.2, responsible source of liquids, and date liquids were removed after each pumping operation.

(V) (G) "CLEAN AND DRY BILGES"

3.8.3 Prior to space turnover, when directed by the SUPERVISOR, accomplish a final detergent cleaning of each bilge of spaces listed in 1.2, removing all trash, debris, grease, oily liquids, and other liquid contaminants from the bilges.

3.8.3.1 Remove and install pumping equipment three evolutions after space turnover to support the requirements of 3.8.1 and 3.8.2.

3.9 Clean each chain locker free of silt, mud, and foreign matter.

3.10 Dispose of liquids in accordance with federal, state and local laws, codes, ordinances or regulations.

3.11 Tank Closure Repairs:

3.11.1 Clean, chase, or tap threaded areas prior to installing covers.

3.11.2 Weld up, drill, and tap a total of 4 stripped manhole cover bolting ring holes for tanks opened in 3.1.

3.11.3 Remove existing and install new a total of 4 missing or broken manhole cover studs for tanks opened in 3.1 conforming to MIL-DTL-1222, Type IV, Grade 304.

3.11.4 Accomplish the requirements of 009-12 of 2.1, including Table 2, Column A, Lines One through 7.

SHIP: ASSAULT CRAFT UNIT FIVE SEA DET. (ACU-5)

3.11.5 Accomplish the requirements of 009-32 of 2.1 for new and disturbed surfaces.

(V) (G) "INSPECT TANK CLEANLINESS"

3.12 Inspect each tank for cleanliness prior to final closing.

3.12.1 Submit one legible copy, in hard copy or electronic media, of a report listing the names of personnel present during inspection to the SUPERVISOR within 72 hours after completion of final closing.

3.12.2 Install manhole cover for each tank, using new gaskets conforming to SAE-AMS-C-6183, Class One, new CRES washers conforming to FF-W-92, Type A, Grade One, Class B, and new brass nuts conforming to MIL-DTL-1222, Type One, Grade 464, and/or CRES hex head cap screws conforming to ASTM A307.

3.12.2.1 Install new gaskets conforming to ASTM D2000-75E, new hex nuts conforming to ASTM A307, and new hex head cap screws conforming to ASTM A307 for DDG-51 Class ships' sewage tanks.

3.12.2.2 Install new gaskets conforming to A-A-55759, Class 3A, Grade 30, and new hex head brass nuts conforming to MIL-DTL-1222, Type I, for DDG-51 Class ships' high temperature compartments.

3.12.2.3 Install new hex head, self-locking nuts (nickel-copper) conforming to NAS-M-25027 for LSD-41 Class ships.

3.12.2.4 Install new cotton wax wicking to studs prior to installing washers and nuts for DDG-51 Class ships.

3.12.2.5 Install new bolts conforming to MIL-DTL-1222, Grade 5, Class 316 (CRES), for flush deck bolted manhole covers.

3.12.3 Install access cover for each potable water, feedwater, and sewage tank, using new gaskets conforming to MIL-PRF-1149, new nuts conforming to MIL-DTL-1222, Type I, Grade 5, zinc coated, and new CRES washers conforming to FF-W-92, Type A, Grade One, Class B.

3.12.4 Confirm that all personnel have exited the space prior to closure of tanks, voids, and cofferdams. Designate one person to account for all personnel who may have entered the space.

3.13 Accomplish the requirements of 009-32 of 2.1 for new and disturbed surfaces.

4. NOTES:

4.1 Location(s) of the Local Naval Fuel Depot(s) receiving off-loaded fuels are is/are available from the SUPERVISOR.

SHIP: ASSAULT CRAFT UNIT FIVE SEA DET. (ACU-5)

4.2 For the purpose of this Work Item, the term "tank or space" includes voids, cofferdams, and inaccessible or confined areas.

4.3 Consider each bilge to contain contaminated oily salt water.

4.4 Booklet of General Plans and Tank Sounding Tables are available for review at the office of the SUPERVISOR.

4.5 The SUPERVISOR will provide sequence of tanks and dates of inspections referenced in 3.1.1.

5. GOVERNMENT FURNISHED MATERIAL (GFM):

5.1 LLTM:

1. None.

5.2 PUSH MATERIAL:

1. None.

5.3 KITTED MATERIAL:

1. None.
